**New Water Systems Council Informational Sheet on
Well Components: Pressure Switches Now Available**

Washington, DC (May 11, 2009) – A new **wellcare**® informational sheet on “Well Components: Pressure Switches” is now available through Water Systems Council. The information sheet explains the purpose of a pressure switch in a well system, offers tips for choosing a pressure switch and provides illustrations and explanations of the various types of pressure switches. The new information sheet is one in a series of sheets on well components. Other **wellcare**® information sheets focus on basic water well information, well maintenance, water well testing and treatment, potential ground water contaminants, and more.

wellcare® information sheets are intended to educate well owners, home buyers, realtors, mortgage companies and others on topics such as well maintenance, well water testing and treatment, water quality, well components and potential ground water contaminants. There are 77 information sheets currently available. They can be downloaded FREE from the WSC website at www.watersystemscouncil.org, or can be obtained through the **wellcare**® hotline at 888-395-1033.

WSC is a national nonprofit organization dedicated to promoting the wider use of wells as modern and affordable safe drinking water systems and to protecting ground water resources nationwide. It is the only national organization solely focused on individual water wells and other private well-based water systems.
