A little bit about ETR Laboratories -

Outstanding service and quality have made ETR Laboratories nationally recognized. WE combine professional staff with state of the art equipment to provide our clients with fast results using the most up to date testing methods. We offer a wide range of testing options at reasonable prices that will address any concern or environmental issue that could affect your water.

Confidentiality is one of the most important elements of our business. We will never share results of any work we do for a client, business, academic or individual unless our client specifically directs us to do so. Our work on your behalf is for your benefit and yours alone.

Q & A from the wellcare® Hotline

Question: Why should I test my well water?

Answer: Private well owners are solely responsible for the quality of their drinking water. Regular water testing is an important maintenance tool to help keep your well water clean and pure and your well operating at peak performance.

For more information on wells and well water visit our website [here](#).

Previous newsletters with additional tips can be found [here](#).

WSC has over 80 different wellcare® information sheets that can help you and your family learn more about managing a water well and protecting your water supply. Visit [our website](#) or contact the wellcare® Hotline at 888-395-1033.
