

MEMBERSHIP ADVANTAGE

Powerful Things Happen When the Water Well Industry Unites!

WELL WATER – NATURALLY BETTER®

Water Systems Council (WSC) was founded in 1932. WSC is the **ONLY** national nonprofit organization with programs solely focused on protecting and promoting private water wells and small shared wells serving more than 23 million households.

WSC VISION

Well water – recognized by all as safe and naturally better.

WSC MISSION

To protect and promote well water systems.

WSC is YOUR Voice in the Water Well Industry!

PROTECT

The only organization solely dedicated to protecting and promoting the water well industry.

PROMOTE

First piece of Federal legislation passed on behalf of the industry that will drive more business to you.

DEFEND

State and local legal representation defending exempt wells and fighting against mandatory hookup.

Statistical Reports Program

The Water Systems Council (WSC) provides a variety of statistical reports based on member-submitted data, designed for members' own use and benefit.

The available reports are outlined in the chart below.

Statistical Reports			
Report	Description	Frequency	Eligible Members
Pump A	Unit shipments include Jet Pumps and Submersible Pumps designed for wells with a diameter of 4 inches or less, Submersible Liquid Ends, Variable Frequency Drives (VFDs), and Three-Phase Motors.	Monthly	Manufacturers
		Quarterly	Manufacturers & Distributors
		Semiannual (By-State)	Manufacturers
Pump C	Unit shipments include Submersible Pumps for wells larger than 4 inches in diameter, as well as Component Submersible Systems.	Monthly	Manufacturers
		Quarterly	Manufacturers & Distributors
		Semiannual (By-State)	Manufacturers
Tank	Unit shipments include Pressurized Water Storage Tanks and Hydropneumatic Storage Tanks used in water systems applications.	Monthly	Manufacturers
		Quarterly	Manufacturers & Distributors
		Semiannual (By-State)	Manufacturers & Distributors
Regional	This report presents five-year average growth trends using compiled data from the Pump A and Pump C reports.	Semiannual	Manufacturers & Distributors

The WSC Statistical Reports Program is available only to active members in good standing. Data is collected confidentially by a third party, and report information is strictly limited to participating companies and may not be shared or published.

- **Eligibility:** Only WSC members in good standing will be eligible to participate in the Statistical Reports Program.
- **Reporting Requirement:** Any WSC member manufacturing products included in the reports must submit data for relevant report(s).
- **Complimentary Reports:**
 - One (1) complimentary report is provided to any WSC manufacturer member.
 - Two (2) complimentary reports are provided to members who submit data for both pump and tank reports.
 - Members who report data for the monthly report(s) and purchase the corresponding monthly report(s) will receive a quarterly report(s) at no additional cost.
- **Additional Reports:**
 - Participating WSC manufacturer members may purchase additional reports for an annual fee of \$825 per report, provided they submit data for each requested report.
- **New Members:**
 - Must be willing and able to provide data for statistical reporting.
 - Eligibility to receive reports follows the vesting schedule provide below. Membership years must be consecutive; otherwise, the vesting schedule resets.

Statistical Reports Eligibility Schedule	
Membership Year	Available Reports
Year 1	Quarterly Reports: Pump A, Pump C, and Tank AND Semiannual: Regional Report
Year 2	Year 1 Reports + Monthly: Pump A, Pump C, and Tank
Year 3	Year 2 Reports + Semiannual: Pump A, Pump C, and Tank

Exclusive Member Reports and Surveys

Special Reports

An Analysis of Mandatory Hookup Laws

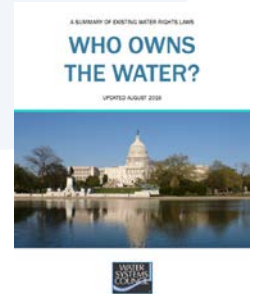

A comprehensive review of state laws that allow local governments to require property owners to connect to public water and sewer systems. Includes judicial interpretations and a state-by-state listing of plumbing codes mandating connection where public water is available.

Fighting Mandatory Hookup

Offers practical guidelines and strategies for opposing mandatory hookup requirements, designed to support landowners and communities facing such mandates.

Who Owns the Water

Provides an overview of groundwater ownership laws across all 50 states, summarizing both common law principles and statutory regulations that define groundwater rights.

Around the States

Monthly Reports – Stay informed with monthly updates covering key legislative and regulatory developments impacting the water well industry, organized by state.

Legislative Issues by State – Tracks proposed and enacted legislation affecting water well professionals.

Regulatory Changes by State – Highlights relevant regulatory updates that could impact operations, compliance, or access to groundwater.

These reports are widely shared by WSC state association members to keep their communities informed and engaged.

Business Conditions Questionnaire (BCQ)

Voluntary Monthly Survey for Manufacturers & Distributors

A confidential monthly survey designed to capture current and projected business trends within the water systems industry.

- **Tracks industry outlooks and trends** reported by manufacturers and distributors
- **Data collected via SurveyMonkey** and compiled by WSC staff.
- **Results are shared exclusively** with participating companies

This survey provides valuable insight for strategic planning and market awareness.

State of the U.S. Water Well Industry Survey & Report

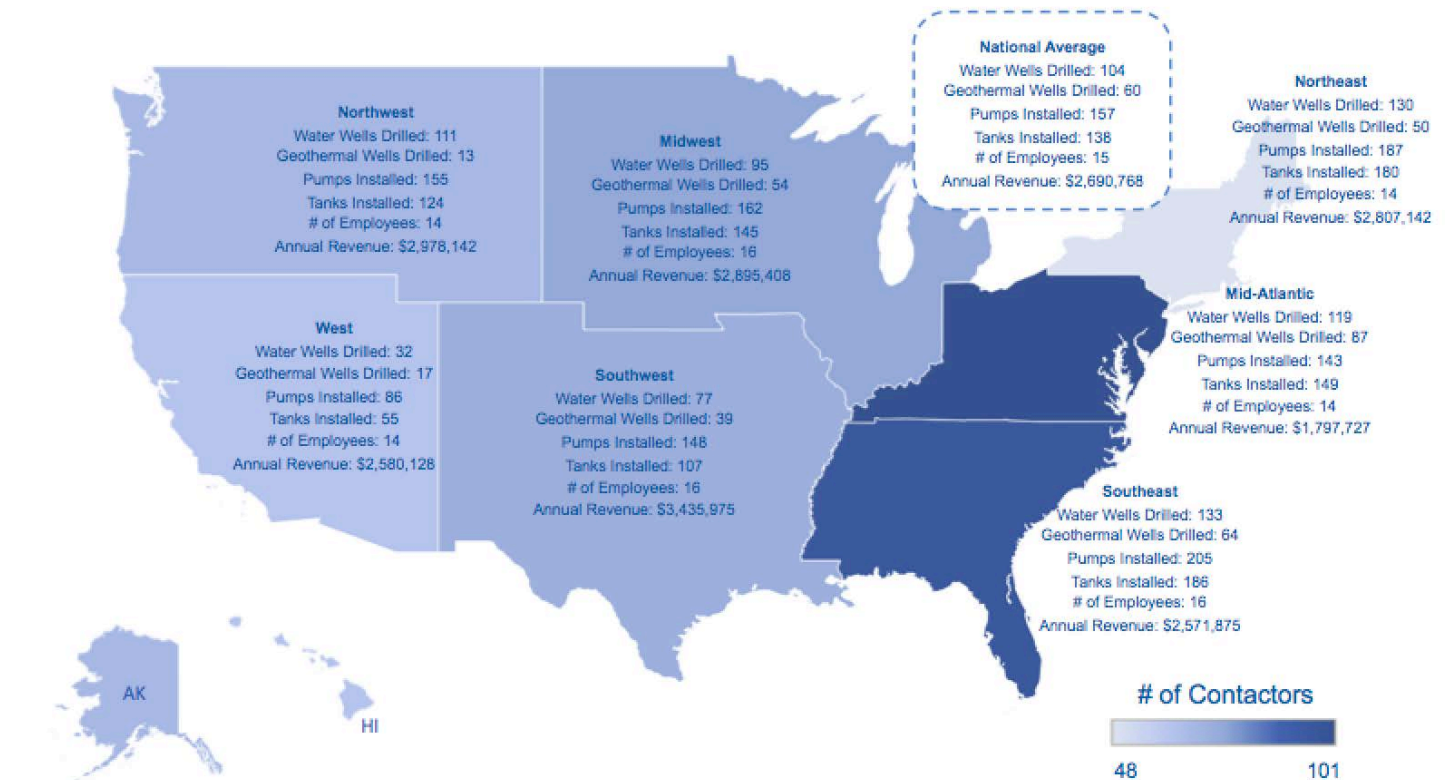

The 2025 State of the U.S. Water Well Industry Report provides a comprehensive overview of the challenges, opportunities, and trends shaping the well water industry. Now in its fourth year, the report reflects the perspectives of industry professionals, offering valuable insights that support informed decision-making, strategic planning, and a deeper understanding of the industry's evolution.

Survey data is collected annually and shared with all WSC members and participating respondents. This data also plays a critical role in advocacy efforts at the local, state, and federal levels.

The survey will continue to be conducted annually, with a new report published each year.

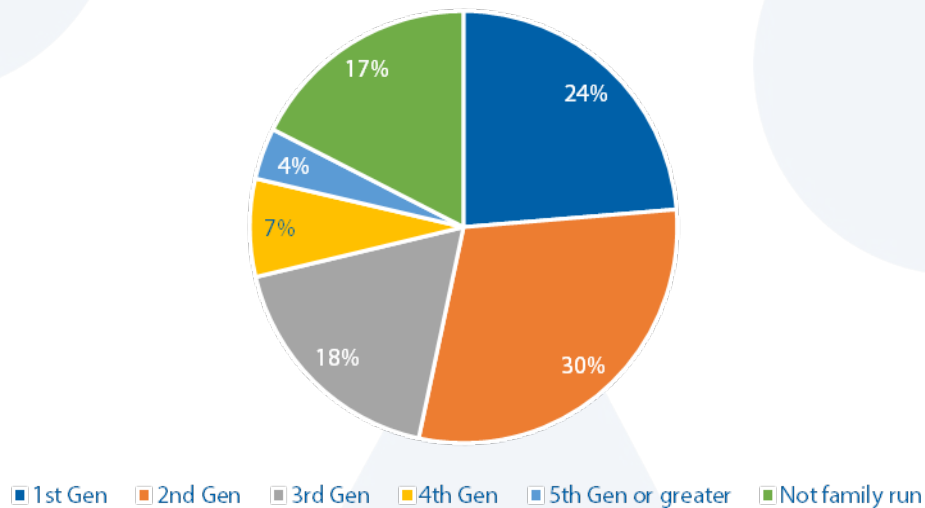

Industry Makeup:

Nationally, the average water well contractor has 15 employees and \$2.7M in annual revenue

82% of respondents are part of a family-owned operation

82 % of respondents are part of a family-owned operation

"I very much appreciate the small family structure of our business.
My employees are my family, and we value each other."
- Survey Respondent

**YOU HAVE A
VOICE!**

Federal and State Advocacy

Monitoring federal and state legislation, ordinances, and regulations that impact the water well industry.

Working with federal and state agencies at the policy level on issues relevant to well owners and the water well industry.

Federal and State Advocacy

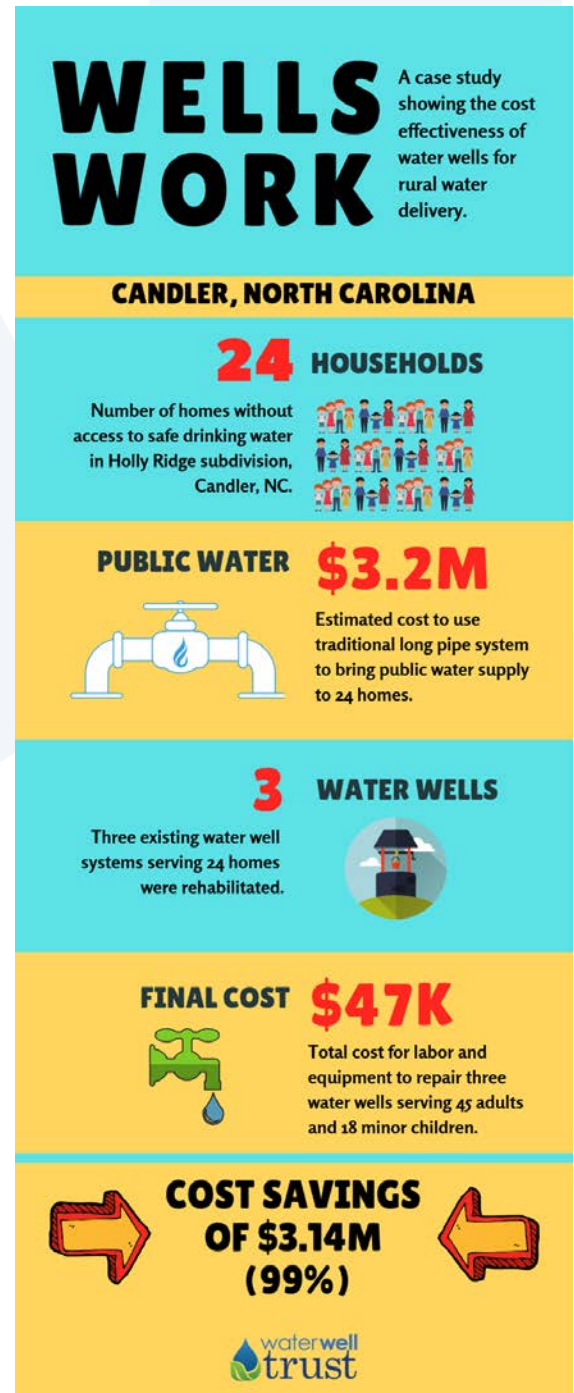

- **Water Supply Cost Savings Act (WSC Savings Act)** – the first piece of federal legislation for the water well industry was enacted into law on December 16, 2016. The WSC Savings Act requires small communities of 500 or fewer who are getting federal funding to consider using wells and well systems when developing water infrastructure. The passage of the Savings Act marks the first-time wells and well systems have been recognized by the federal government as a cost-effective, sustainable way to deliver safe drinking water to rural communities.
- **American Water Infrastructure Act (AWIA)** was enacted into law on October 25, 2018. This Act includes Securing Required Funding for Water Infrastructure Now (SRF WIN) Act and was championed by WSC. The passage of the America's Water Infrastructure Act, that includes the SRF WIN Act, greatly increased the much-needed funding for the Water Supply Cost Savings Act's targeted communities in need of water infrastructure.
- **Infrastructure Investment and Jobs Act** – enacted in November 2021 included funding for both clean water and drinking water infrastructure -- specifically, direct funding over the next five years of \$55 billion that will be matched by the states. This new historic funding for drinking water infrastructure specifically targeted disadvantaged communities for the first time, including rural disadvantaged communities served by wells and well systems.
- **Farm Bill** – Working with Senator Booker (D-NJ), Senator Capito (R-WV), Congresswoman Sewell (D-AL), and Congressman Rogers (R-AL), WSC has developed legislation that will reauthorize \$20M annually over the next five years for the Decentralized Water Systems (DWS) Grant Program in the Farm Bill. New proposed provisions in the DWS include raising the loan amount available from \$15,000 to \$20,000 and bringing the required income level back up to 100% Non-metropolitan area medium income. Also added language permitting grant recipients to use up to 10% of the grant to provide technical assistance and support related to the installation and maintenance of a decentralized water system.
- **Healthy H2O Act** – This bipartisan bill, championed by WQA, would provide grants to individuals, nonprofits, or local governments for water quality testing as well as the purchase and installation of point-of-use or point-of-entry water filtration systems that remove or significantly reduce health-based contaminants from drinking water. WSC continues to collaborate with WQA on calling for the passage of this bill, especially in light of emerging contaminants like PFAS.

Federal and State Advocacy

Senator Boozman (R-AR) stated, “the Water Systems Council was an integral part of getting this legislation included in AWIA and I couldn’t have done it without their help. I would like to thank WSC for its efforts in support of the SRF WIN Act.”

Next Steps

- WSC has created a website: www.waterprojectfunds.com which is a comprehensive guide on funding sources, planning resources, and case studies for rural community drinking water infrastructure projects.
- In 2025, WSC is advocating for Farm Bill passage that includes the USDA’s Decentralized Water Systems Grant program that supports our nonprofit, the Water Well Trust, providing funding for wells and septic systems for low-income Americans.
- Also, in 2025 WSC is working with the Water Quality Association to confirm the passage of the Healthy H2O Act., legislation that would provide direct assistance to rural communities, households, and non-profits to provide funding for the testing of drinking water and fund filtration technology to provide safer drinking water.

Water Systems Council files amicus briefs in court cases throughout the United States effecting the water well industry.

Recent Cases:

GA SB121

The Georgia Association of Groundwater Professionals (GAGWP) successfully led a legislative effort resulting in a new Georgia law that prohibits local governments, counties, and municipalities from denying the drilling, servicing, or repairing of water wells on single-family residential and farm properties. This marks a major victory for the water well industry, reinforcing property owners' rights to access groundwater. GAGWP is now working with similar associations in South Carolina and North Carolina to advance comparable legislation, with the potential to establish a broader regional and national trend limiting mandatory municipal water hookups.

United States Supreme Court Case:

County of Maui, Hawaii v. Hawaii Wildlife Fund

This case involved “groundwater as a conduit” or “indirect discharges” under the Clean Water Act. The majority rejected the positions of both parties in the case by producing its own test: that a permit is required if the discharge is the “functional equivalent” of a direct discharge. There is a lack of clarity in the decision. Inevitably, the United States Supreme Court will have to decide one or more additional indirect discharge cases before the rule is clear.

United States v. Sackett

Ruling on an aspect of the definition of “waters of the United States,” this decision provided a small bit of clarity with respect to adjacent wetlands, many questions remain. The federal regulations continue to promote uncertainty and generate litigation. The Sackett decision also highlighted the allocation of authority between the state and federal governments with respect to water issues. While the Sackett decision means that states will decide the direction of water quality issues, a pending United States Supreme Court case may shift authority to the federal government in water supply issues.

Texas v. New Mexico

The Court heard oral arguments in 2024; no decision at this time. In that case, the federal government has objected to an agreement between the states to resolve a dispute over the Rio Grande Compact. The United States asserts that the federal government should control water allocation issues on the Rio Grande River, continuing a trend where the federal government attempts to assert ownership over water resources.

More Cases:

Nevada Supreme Court – Surface Water and Groundwater

A ruling was issued in early 2024 that allows combined regulation of surface water and groundwater, along with combining different groundwater aquifers for purposes of regulatory control. Other states will likely follow.

Becker v. City of Hillsboro

In *Becker v. City of Hillsboro*, 667 F. Supp. 3d 996 (8th Cir. Ct. App. 2025), the Eighth Circuit upheld the City of Hillsboro's ordinance requiring new residences to connect to the municipal water system and prohibiting private wells. The plaintiffs, trustees of the Antoinette Ogilvy Trust, argued that the regulation constituted an unconstitutional taking since the cost of connecting public water to the eight lots, between \$963,000 and \$1,578,000, would make development economically impossible. However, the court found no taking had occurred, reasoning in part that the ordinance did not eliminate all economic use of the property and that the plaintiffs could avoid a taking by simply not developing the property.

Loper Bright Enterprises v. Raimondo (2024)

In 2024, the United States Supreme Court overturned a 40-year-old test for interpreting federal laws. The old test deferred to the agency interpretation and treated the agency as the expert. Now, the Court will take the lead in interpreting federal law. This new approach could have a huge impact on waters of the United States and other issues.

Connelly v. United States (2024)

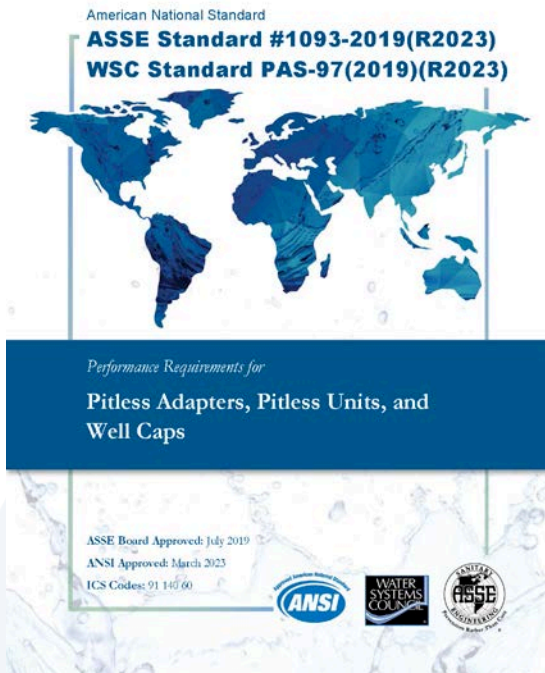

In 2024, the United States Supreme Court made a decision that impacts family business succession. The Court unanimously held that when a limited liability company owns a life insurance policy on the owners to fund a buyout upon the death of an owner, the proceeds must be included in the value of the limited liability company for estate tax purposes. This cost the owners hundreds of thousands of dollars in estate tax. Everyone should be mindful of the tax consequences of various ways to own life insurance.

Water Well Standards

WSC spearheads the development of national performance standards in partnership with American Society of Sanitary Engineering (ASSE).

These standards help ensure quality and consistency across the water systems industry.

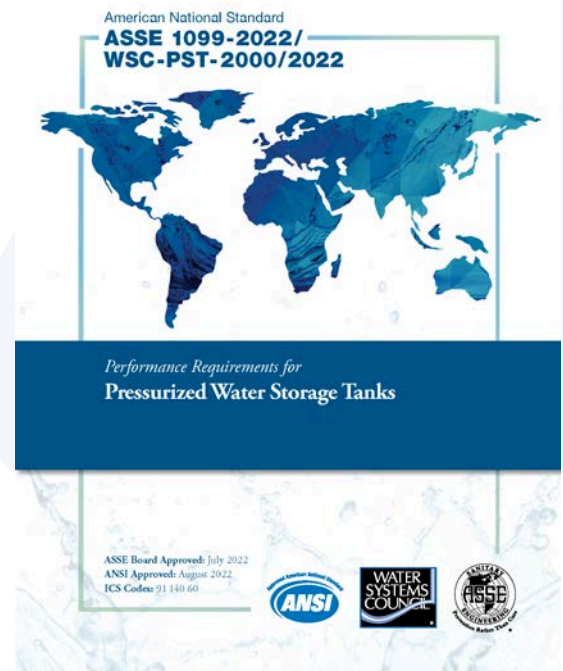

ASSE Standard #1093-2019 (R2023) / WSC Standard PAS-97 (2019) *Performance Requirements for Pitless Adapters, Pitless Units, and Well Caps*

- **Accepted into:**
 - Uniform Plumbing Code (UPC) – 2027 Edition
 - International Plumbing Code (IPC) – 2027 Edition
- **ANSI Approved**
- **Product Listing:**
 - Complimentary for WSC members
 - Available to non-members for a fee

ASSE Standard #1099-2022 / WSC-PST 2000-2022 *Performance Requirements for Pressurized Water Storage Tanks*

- **Accepted into:**
 - Uniform Plumbing Code (UPC) – 2024 Edition
 - International Plumbing Code (IPC) – 2027 Edition
- **ANSI Approved**
- **Product Listing:**
 - Complimentary for WSC members
 - Available to non-members for a fee

Well Connected®

Monthly Member Newsletter

Exclusive to WSC Members

*Stay informed with the **latest updates and insights** delivered directly to your inbox each month.*

- **Timely Industry News** – Covers the most current developments, trends, and issues affecting the water systems industry

13TH EDITION

Water Systems Handbook

*A complete text on wells:
their design, operation, and maintenance*

Water Systems Handbook – 13th Edition

This handbook has eight (8) booklets with basic information on well design, operation, and maintenance to boost the professional knowledge of well industry personnel.

- Book I – Well Fundamentals
- Book II – Pumps
- Book III – Service
- Book IV – Components
- Book V – Water Quality Assurance
- Book VI – Electrical Safety, Controls & Regulators
- Book VII – Community Water Systems, Shared Wells Groundwater Heat Pump
- Book VIII – Sizing (NEW)

The Big Rig

Children's Book

This book on wheels educates the importance of protecting groundwater and learning the water cycle.

Special Report Mandatory Hookup Law &

Fighting Mandatory Hookup

This publication offers a comprehensive overview of state laws and court cases related to mandatory connections to public water and sewer systems. It includes a 2019 updated report analyzing how local governments enforce these requirements across all 50 states. Additionally, it provides guidance for those seeking to challenge mandatory hookups, and is intended to be used alongside the Water Systems Council's Special Report for a full understanding of the legal landscape.

Family Business Succession Planning for the Water Well Industry

Written by Jesse Richardson, this publication provides a brief overview of some of the most important considerations in family business succession.

Check out the four (4) part webinar series on the [WSC YouTube Channel](#).

FAMILY BUSINESS SUCCESSION FOR THE WATER WELL INDUSTRY

by Jesse J. Richardson, Jr., J.D.

Supporting Private Well Owners

The Water Systems Council (WSC) is a leading educational resource for private well owners, offering guidance on well maintenance, water testing, treatment, and all aspects of water well ownership.

Hotline Program

WSC's Hotline answers questions submitted by phone, website, and live chat. Since 2003, the hotline has responded to more than **134,000 inquiries** from well owners and others seeking technical assistance and information on wells and groundwater.

Well Owners Network

Free to join, the Well Owners Network has over **13,500 members**, primarily homeowners. Members receive a **quarterly newsletter** with tips and seasonal guidance, plus **discounts on well water test kits**.

HELP Program (Homeowner Emergency Localized Plan)

The HELP Program provides critical resources to homeowners, as well as local and state agencies, during natural disasters and emergencies.

New: Download the *Emergency Preparedness for Homeowners with Water Wells* guide and *Emergency Kit Essentials* graphic at watersystemscouncil.org/emergency-agencies

Interactive Emergency Map

Locate emergency management agencies, health departments, certified water testing laboratories, and licensed water well professionals by state through our [interactive map](#).

wellcare® Information Sheets

Explore over **100 fact sheets** covering topics such as well maintenance, water quality, and treatment. Select sheets are available in both **English, French, and Spanish**.

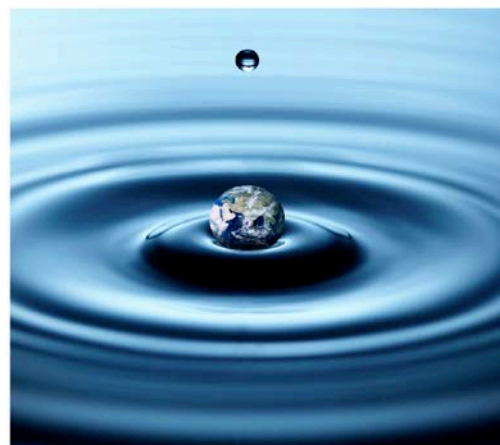

View the full library at watersystemscouncil.org/water-well-help/wellcare-info-sheets/

Well Owner's Manual

The 32-page *Well Owner's Manual* is a comprehensive guide covering key topics such as water well systems, maintenance, contractor selection, wellhead protection, water testing, and understanding test results. It also features a helpful well owner's checklist and information on the **wellcare® Hotline**, a free resource offering expert advice on protecting, maintaining, testing, and conserving drinking water.

This publication is **available for free** in both **English and Spanish**.

A Quick Guide for Well Owners:

Simple Tips on Caring for Your Water Well

This complimentary convenient brochure offers well owners a quick overview of important topics such as technical concerns, water testing, well maintenance, and wellhead protection. It includes a fillable section to store contact information for your water well professionals, as well as links to helpful websites for water testing and finding licensed well contractors.

Committees

- **General Membership Committees**

Any member of WSC in good standing is a voting member of the General Membership Committee.

- **Government Affairs – Richard Mest, Chair**

This committee is to provide input and direction regarding WSC's efforts in support of the water well industry at the federal, state and local levels including our efforts to retain and increase Congressional support for our programs.

- **Marketing – Sean Toolan**

Foster the awareness of the WSC's mission, to protect and promote well systems. Develop, maintain, and adhere to brand consistency guidelines. Generate specific messaging and content for target audiences. Goal: Growth in membership and engagement within the industry.

- **Technical –Tom Stephan, Chair**

This committee provides technical expertise for the development of WSC publications, technical manuals, workshops, and training programs. It is also a technical resource for the wellcare® Hotline.

- **Limited Membership Committees**

Membership in Limited Membership Committees is defined in WSC's bylaws in the committee's description for each Limited Membership Committee. Only members of a Limited Membership Committee can vote on that committee's business.

- **Distributors – Mark Ball, Chair**

This committee advises on issues of interest to the Distributor Members of WSC and promotes WSC membership among distributors. Membership on this committee shall be automatic for each Distributor Member.

- **Contractors – Scott Burroughs, Chair**

This committee advises on issues of interest to the Contractor Members of WSC and promotes WSC membership among contractors. Membership on this committee shall be automatic for each Contractor Member.

- **Manufacturer Representatives – Bernie Kistner, Chair**

This committee advises on issues of interest to the Manufacturer Representative Members of WSC and promotes WSC membership among manufacturer reps. Membership on this committee shall be automatic for each Manufacturer Representative Member.

- **Pitless Adapter Standard – John Surinak, Chair**

This committee advises on issues related to pitless adapters and well caps as components of household wells and small shared water well systems. This committee is also responsible for the WSC PAS-97(2012) Pitless Adapters, Pitless Units, and Well Caps Standard. Membership on this committee is automatic for each manufacturer member that manufactures pitless adapters and/or watertight well caps.

- **State Association – Vacant**

This committee advises on issues impacting the water well industry and issues important to the State Association Members of WSC. Membership on this committee shall be automatic for each State Association Member.

- **Statistical Reports – Jill Boudreau, Chair**

This committee monitors and advises on all issues related to the WSC Statistical Reporting Program including program rules. Membership in this committee is open to all WSC Members who participate in the Statistical Reporting Program.

- **Tank – Steve Agnoli, Chair**

This committee advises on issues related to tanks as a component of household wells and small shared water well systems. This committee is also responsible for the WSC-PST-2000-2022 / ASSE 1099-2022 Pressurized Water Storage Tank Standard. Membership on this committee is automatic for each manufacturer member that manufactures tanks for water well systems.

Committees (more)

- **Appointive Committees**

Membership in Appointive Committees is defined in the WSC bylaws in the committee's description for each Appointive Committee. Only members of an Appointive Committee can vote on that committee's business.

- **Development – Fred Fann, Chair**

This committee helps to identify new projects and program opportunities and resources for WSC. The committee is made up of four (4) WSC members appointed by the President in addition to a Vice President who is the chairperson.

- **Finance – James Sharrock, Chair**

To look after the financial wealth of the organization.

- **Membership – Mike Wesdell, Chair**

This committee is to promote WSC to prospective members and to advise the Board of Directors on the qualifications of applicants for membership in WSC. The committee shall consist of at least one (1) representative from each of the following: Manufacturer Members, Distributor Members, Allied Interest Manufacturer Reps and State Associations. Members are appointed by the President.

- **Nominating – Fred Fann, Chair**

This committee nominates a slate of prospective members for the Board of Directors and presents the slate to the members at the annual (fall) meeting. The nominating committee shall consist of three (3) members of the Board of Directors appointed by the President.

Board of Directors

EXECUTIVE COMMITTEE

President – Mark Heflin – Franklin Electric Co., Inc.

Vice President – Fred Fann – A. O. Smith Water Systems

Treasurer – James Sharrock – Amtrol / Worthington Enterprises

Distributor Member – Mark Ball – Milby Company

Past President – Matt Servant – Pentair

BOARD MEMBERS

Stephen Anderson – Merrill Manufacturing Co.

Jill Boudreau – Xylem

Scott Burroughs – Mather Pump Service

Gerry Duggan – Flexcon Industries

Richard Mest – Master Water Conditioning Corp.

Patrick Sless – Grundfos

Julie Storey – Boshart Industries

Michael Wesdell – Baker Water Systems

Become a Member

Manufacturer: A person or any type of business enterprise that is currently engaged in North America in the manufacture and sale of any finished component of either a water system or of equipment or materials used to construct a water system shall be eligible for Manufacturer Membership. Those Applicants eligible for Manufacturer Membership shall not be eligible for any other class of membership in the Council.

Distributor: A person or any type of business enterprise currently engaged in North America in the wholesale purchase and resale of finished components intended for use in water systems. Neither water well drillers nor water well pump installation contractors shall be eligible for Distributor Membership.

Contractor: Water Well contractors with an interest in the water well industry who are not eligible for membership under any other category.

Association: An association of water well contractors or other associations involved in activities related to the water well industry.

Manufacturer Representative: An association or any type of business enterprise currently engaged in the sale of materials or services used in the water well industry and not a Manufacturer or Distributor as described above.

Other Individual: Individuals with an interest in the water well industry who are not eligible for membership under any other category.

Membership Category	Annual Sales Volume	Annual Membership Fee
Manufacturer / Distributor	\$0 - \$3M	\$5,325.00 / \$532.50
Manufacturer / Distributor	\$3M - \$5M	\$8,950.00 / \$895.00
